CÁLIZ

ES EL ÓVULO FECUNDADO DE LA PLANTA. SUELE SER COMESTIBLE.

FRUTA

ES LA PARTE EXTERNA DE LA FRUTA. PUEDE SER LISO, GRANULOSO, CEROSO O PILOSO.

PIEL

ES LA PARTE COMESTIBLE DEL FRUTO. PUEDE SER GRANULOSO O CARNOSO.

PULPA

ES LA ESTRUCTURA MEDIANTE LA CUAL LAS PLANTAS SE REPRODUCEN.

SEMILLAS

ES LA PARTE DE LA FRUTA QUE LA
UNE A LA PLANTA.

TALLO

EN EL TALLO PODEMOS ENCONTRAR
HOJAS DE LA PLANTA QUE ESTÁN
CERCA DE LA FRUTA.

HOJA

ES LA CAPA INTERNA QUE ENVUELVE
A LA SEMILLA.

ENDOCARPIO

ES EL RESTO DE LA FLOR QUE QUEDA
TRAS LA SALIDA DEL FRUTO.
